Volume 10

1. Benjamin Warren. The Midpoint of the Incenter and the Circumcenter is the Center of a Conic Section, pp. 1-3.
2. Benjamin Warren. The Incenter as a Homothetic Center of the Intouch Triangle, pp. 4-7.
3. Benjamin Warren. The Centroid of a Triangle Lies on a Twin Circle, pp. 8-10.
4. Benjamin Warren. Generalization of the Incenter, Gergonne Point, and X(104), pp. 11-14.
5. Benjamin Warren. Generalizations of the Circumcenter, the Exeter Point, X(25), and the Euler Line, pp. 15-17.
6. Benjamin Warren. The Diagonal Intersection of a Complete Tangential Quadrilateral Lies on the Radical Line of Two Certain Circles, pp. 18-19.
7. Benjamin Warren. A Set of Coaxal Circles in Reference to a Triangle, pp. 20-28.
8. Benjamin Warren. A Point in Reference to the Intouch Triangle, pp. 29-35.
9. Benjamin Warren. Generalization of the Fuhrmann Circle, pp. 36-40.
10. Benjamin Warren. Coaxal Circles that Arise from the Pedal and Circumcevian Triangles, pp. 41-44.
11. Benjamin Warren. Generalization of the Perspectrix Formed by a Triangle and a Cevian Triangle, pp. 45-47.
12. Benjamin Warren. The Bottema Point Lies on an Eight Point Circle, pp. 48-51.
13. Benjamin Warren. The Centroid Lies on Another Circle, pp. 52-54.
14. Benjamin Warren. A Line Associated With a Conic Section Passing Through the Sides of a Triangle, pp. 55-64.
15. Benjamin Warren. Simple Generalization of Musselman's Theorem, pp. 65-68.
16. Benjamin Warren. Generalization of the Isoperimetric Point and the Equal Detour Point, pp. 69-70.
17. Benjamin Warren. A Circle Centered at the Nine Point Center, pp. 71-73.
18. Benjamin Warren. Three Points on the Orthocentroidal Circle, pp. 74-76.
19. Benjamin Warren. Coaxal Circles in the Context of the Circumcevian Triangle, pp. 77-80.
20. Benjamin Warren. Two Circles That Concur on the Euler Line, pp. 81-85.
21. Benjamin Warren. Three Concurrent Circles in the Context of a Certain Type of Hexagon, pp. 86-90.
22. Stanley Rabinowitz, Ercole Suppa. More Relationships between a Central Quadrilateral and its Reference Quadrilateral, pp. 91-123.
Supplementary material – proofs.
23. Dan Ismailescu, Yunkyu James Lee, A Class of Special Tetrahedra, pp. 124-126.
24. Dylan Wyrzykowski, On a Family of Circumconics, pp. 127-132.
