Volume 9

1. Samuel Porritt. On a pair of twin conics, pp. 1-8. 05.02.
2. Benjamin Warren. The Ellipses that Pass Through a Triangle Vertex Whose Foci are the Other Two Vertices, pp. 9-11. 02.02
3. Benjamin Warren. The Midpoint of the Midpoints of the Diagonals of a Quadrilateral, pp. 12-15. 24.02
4. Benjamin Warren. On a Certain Permutation Ellipse, pp. 16-19. 29.02
5. Benjamin Warren. The Midpoints of the Vertices and the Midpoints Between the Vertices and the Circumcenter Lie on the Same Conic, pp. 20-22. 04.03
6. Benjamin Warren. More on the Circles Which are Centered at Vertices of a Triangle and Passing Through the Rest of the Vertices, pp. 23-25. 08.03
7. Benjamin Warren. The Diagonal Intersection Lies on the Radical Line of Two Certain Circles in a Quadrilateral, pp. 26-29. 09.03
8. Nima Sarlak. Discovery of a property in 3-orthoschemes using computer, pp. 30-31. 11.03
9. Benjamin Warren. Concurrence of Three Newton Lines, pp. 32-34. 20.03
10. Benjamin Warren. The Newton Lines of the Quadrilaterals which Dissect a Regular n-gon by a Vertex and the Adjacent Vertex Midpoints are Concurrent, pp. 35-37. 21.03
11. Benjamin Warren. The Newton Lines of Three Certain Quadrilaterals Formed from a Triangle are Concurrent, pp. 38-40. 22.03
12. Benjamin Warren. Generalization of a Result about Concurrent Newton Lines Formed from Regular Polygons, pp. 41-43. 23.03
13. Benjamin Warren. Generalization of the Triangle Centroid and the Van Lamoen Circle, pp. 44-53. 11.04
14. Benjamin Warren. Further Generalization of a Result about Concurrent Newton Lines, pp. 54-77. 17.04
15. Benjamin Warren. An Extension of the Van Lamoen Circle, pp. 78-81. 20.04
16. Benjamin Warren. Generalization of a Result about a Certain Point on the Nine Point Circle, pp. 82-87. 20.04
